

BRUNO TRENTINI

📍 London, Maida Vale W9 ✉ bruno.trentini@outlook.com 📞 +44 (0) 7496 005 137
🌐 brunotrentini.com 🐙 [btrentini](https://github.com/btrentini) 🌐 [btrentini](https://www.linkedin.com/company/btrentini) 📄 Python, Java, C++, Julia, Matlab

EDUCATION

University College London (UCL)	Sep 2019 - Sep 2020
MSc. Data Science & Machine Learning, <i>Distinction TBC</i>	London, UK
University College London (UCL)	Sep 2018 - Nov 2018
MSc. Robotics & Computation, <i>Changed to the above degree</i>	London, UK
Universidade Tecnológica Federal do Parana (UTFPR)	Mar 2012 - Sep 2013
PgDip. Telematics & Computer Networks	Curitiba, BR
Pontificia Universidade Catolica do Parana (PUCPR)	Jan 2018 - Dec 2011
BSc. Information Systems	Curitiba, BR
Exchange to Bishop's University	Sherbrooke, CA
Exchange to Université de Technologie de Compiègne	Compiègne, FR

RELEVANT COURSEWORK & PROJECTS

📚 Relevant coursework, MSc. Data Science & Machine Learning:

Deep Learning - Grade 95% (CNN, RNN, LSTM, Autoencoders)
Machine Learning (Classic algorithms and Deep Learning and GANs)
Graphical Models (Variational Inference, Hidden Markov Models, Gaussian Mixture)
Reinforcement Learning (JAX, Haiku; QQ-Learning, Dyna-Q, etc)
Applied Machine Learning (XGBoost, KNN, CNN, Ensemble Methods, KNN, K-Means)
Applied Bayesian Methods (Sampling, Priors, Hierarchical Models, Belief Networks)
Natural Language Processing (BERT, NLTK, AllenNLP)

🏆 **Plankton Challenge:** Led a team of 5. Implemented CNNs (from scratch or tuning pre-trained models such as Resnet50, VGG-16 and Inception V3) to classify 121 classes of Plankton across thousands of images.

Log loss was equivalent of 3rd out of 1049 teams (expired Kaggle Competition).
Built dashboard to measure model performance on the go
Used Tesla T4 and P100 GPUs via Google Colab
Designed experiments with data pre-processing and online augmentation

📦 Additional training and experiences obtained in C, C++, Matlab, Julia, C#, Shell and Java

EXPERIENCE

Kit-AR — Research Intern, Machine Learning 📍 London, UK · Jun 2020 - Present

- Developed a new algorithm for unsupervised human activity recognition (Python)
- Implemented speech and deep learning algorithms: DTW, CTC, HMM, VRAE, LSTM
- Created a dataset containing video, spatial maps and sensor data with Microsoft HoloLens

NVIDIA — AI Startups Ecosystem Manager 📍 London, UK · Dec 2018 - Dec 2019

- Mentored 100⁺ Startups on implementing machine learning with GPUs and relevant SDKs
- Automated internal processes using Python, making colleagues 48× more efficient

HotelBeds — Commercial Analytics Manager 📍 London, UK · Oct 2017 - Oct 2018

- Developed clustering algorithms to identify traveller spend groups (Python)
- Developed models for time-series data from wrangling to inference (Python, SQL)
- Led commercial analytics with 1 direct report, contributing to 2% revenue growth YoY

Alliants — Consultant 📍 London, UK · Oct 2014 - Sep 2017

- Optimised digital spend for a “Travel Business” by 30% (18M EUR across 23 markets)
- Developed data migration procedures (SQL) for a global financial services company

GVT — Product Manager II 📍 Curitiba, BR · Jun 2012 - Sep 2014

- Managed a new product from idea to implementation with a budget of R\$2M and 30 FTE
- Led cause-and-effect analyses (Pareto, Ishikawa, etc), reducing a CRM unit’s OpEX by 60%

Ernst & Young — Trainee of Advisory 📍 Curitiba, BR · Jun 2011 - Jun 2012

- Developed SQL and ACL scripts to detect systemic vulnerabilities in regulated companies
- Ran and maintained shell scripts for audit in Redhat, Debian and Ubuntu distributions

HSBC — Trainee Software Analyst 📍 Curitiba, BR · Jun 2008 - Dec 2010

- Documented software (UML Notation) and gathered requirements
- Developed COBOL and DB2 applications in a major global data integration project

AWARDS

🏆 **Winner** of “Best Business Solution” at the “2019 Data Science Society Hackaton” with Microsoft and Amex. Led a team of 5 out 100 participants across 20 teams (Dec 2019)

🏆 **Awarded** “Professional Membership” in the British Computer Society (Jun 2017)

🏆 **Runner-up** out of 40 teams at the III Mobile Games Exhibit promoted by PUCPR with game developed in partnership with 2 fellow students using Java J2ME. *Game Bug Busters* available on Github <https://github.com/btrentini/bugbusters> (Dec 2009)

📜 **Certified** ITIL v3 Foundation (Mar 2013)
